PROJECTS

LifeQuest | Hackathon Project 2026

Grocery Inventory Management System | PostgreSQLJune - Jul 2026

- Designed a full-stack inventory management system connecting a responsive dashboard, backend APIs, and PostgreSQL database for grocery operations.
- Developed REST APIs for products, suppliers, purchases, sales, inventory tracking, and reporting through structured backend services.
- Implemented PostgreSQL functions, triggers, constraints, and views to automate stock validation, transaction processing, and inventory reporting.
- Built an interactive dashboard providing inventory insights, low-stock alerts, expiry tracking, sales analytics, and product management capabilities.
- Tech Stack: PostgreSQL, HTML, CSS, JavaScript

TRAINING

Launched Global / Shaip | Data Science Mentorship ProgramOct 2025 - Nov 2025

Data Science Trainee

- Applied Python-based data science techniques to analyse a dataset for bike sales prediction.
- Performed data preprocessing and exploratory analysis using Pandas, NumPy, and Jupyter Notebook.
- Developed a machine learning model using Scikit-learn to predict bike sales from relevant dataset features.

CERTIFICATES

- Computer Programming | NeoColab | 150-hour course | May 2026
- Introduction to Cyber Security | Infosys Springboard | Mar 2026

ACHIEVEMENTS

- Secured 7th position in a college hackathon by developing the LifeQuest simulation-based learning project.
